DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/27/07 has been entered.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The amended title is not reflective of the invention as claimed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9-20 rejected under 35 U.S.C. 102(b) as being anticipated by Iwai Shiro of Honda Access Corp (JP 2001-155801).

Shiro (Figures 18-26) shows an electrical equipment unit protection device comprising an electrical equipment unit with a plurality of adjacent function portions 4 connected together by wires 104 and a design portion 5 attached to the function

portions, an electrical unit holder with adjacent retaining portions 2 connected by an elastic interconnecting portion 101 to hold the adjacent function portions a predetermined distance apart from each other. The electrical equipment unit is a lamp unit 3 with bulbs and bulb covers 5 which open a side opposite to a side where the wires are mounted. The function portion has a guide portion (not numbered) which engages a portion 64 of the bulb cover. The retaining portions 2 and the interconnecting portion 101 are integrated into a single body by the interconnecting portion 101.

Conclusion

5. This is a RCE of applicant's earlier Application No. 10/562,575. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

6. Applicant's arguments filed 12/27/07 have been fully considered but they are not persuasive. The retaining portions 2 and the interconnecting portion 101 are integrated into a single body by the interconnecting portion 101.
